

## Decommissioning Overview

Caski Consulting Ltd (Caski) have an active association with a US firm, Absolute Consulting Inc., who have in-depth knowledge and experience providing decommissioning and other related services to the nuclear power industry in the USA.

Caski can provide, via this association, a complete range of nuclear project services: Dry Fuel Storage, Decommissioning, Environmental and Plant Services. Assessments, project oversight, peer reviews, audits, senior level management consulting, engineering support, construction management, licensing, technical procedure writing, waste management, site cleanup, and environmental services are all among our many areas of expertise.

Caski can also provide project management and construction supervision services. Our multidisciplinary team has the necessary engineering and project management depth to develop innovative solutions to our clients' challenging, and often complex, needs. The diverse background and experience of our staff allows us to provide effective project scheduling and cost savings for our customers.

Caski's associates have been the driving force in planning, developing and implementing the processes used today by the U.S. Government and the commercial nuclear power industry. Caski has been engaged from the conceptual design stage through implementation on a majority of the commercial decommissioning projects within the US.

The strength of our organisation lies in the cumulative experience of our professional staff; all of whom are committed to providing quality services to our clients.

Our staff has a thorough understanding of all aspects of the nuclear industry and has established highly respected working relationships with many of the regulatory agencies.
